ISLA TILES

Gems derives from ISLA's interpretation of the parallels that exist between precious gems and wood.

Drawing inspiration from rustic wood, the aesthetics of Gems are characterised by intriguing chromatic variations, unpredictable vein patterns and the appealing effects of wear that typify both wood and gemstones. Available in four on-trend colours - White, Agate, Quartz and Fumée - the Gems collection expresses the depth and intensity of two of the materials most highly prized by contemporary design.

The textured effect accentuates the vividness of the colours and is perfectly showcased by the wide range of installation patterns that can be created with the floorboard formats in the range. The results stand out most in the Shanghai version, which derives from the apparently random juxtaposition of slim listels of varying lengths and widths.
