

Essence

The quintessential natural material, in architecture wood conveys warmth and a pleasant sense of hospitality. ESSENCE is a floor and wall tile collection by ISLA inspired by various types of wood made of porcelain stoneware that, thanks to sophisticated digital technology, is stunningly accurate in detail, mimicking the original structure of the material with the pleasant irregularity of the natural grain surface pattern. ESSENCE offers a twofold advantage: the entrancing loveliness of wood combined with the resistance and practicality of ceramic, making it an ideal material for today's spaces thanks to its original colours and sizes.

ESSENCE is available in five different colours to enhance any type of decor, from traditional to contemporary design. CREAM, MAHOGANY and BROWN are warm nuances, which harmonize with the naturalness of the material of inspiration, while WHITE and GREY have a more contemporary vibe, perfect for modern spaces. The choice of sizes is particularly interesting: they can be combined together to create original installation layouts: from slats, which may be used both as floor and wall tiles (available in the 20x120, 30x120 and 26.5x180 cm sizes) up to basket weave mosaic and hexagon mosaic. The collection is particularly suitable for residential use and to give a touch of elegance and personal style to commercial and contract projects.

Technology: full-body porcelain stoneware

Colours: Cream | Mahogany | Brown | White | Grey

Sizes and finishes:

cm. 20x120 rectified

cm. 30x120 rectified

cm. 26.5x180 rectified
