

Selezione Marmi

An eternal material which turns its back on ephemeral fashion to leave a lasting mark. **Selezione Marmi**, the new porcelain stoneware collection from ISLA TILES, offers the beauty of the king of stones to the client looking for a statement of timeless elegance, ideally suited to both contemporary and traditional design.

The delicate veining of this material, which the Greeks called "the splendid stone", is enhanced by the most modern ceramic technology to create a modern decorative motif characterised by the interruption of its lines in the brick effect. This original size gives new life to a traditional aesthetic, making it topical and original.

Selezione Marmi is available in four elegant colours, from white through grey to black, and in two finishes: ground and polished-ground. There are five sizes, up to the large 60x120 mm tile, to which are added the mosaics Intreccio and Esagona, offering ever new, personalised options for installation.

Technology: porcelain stoneware
