

Shibusa

Balance and harmony. A designer wood which emanates a sense of sophisticated refinement, the serenity of an almost abstract elegance, pure and fascinating. The re-interpretation of wood, the most natural of all materials, gives us SHIBUSA, the ISLA TILE collection in porcelain stoneware inspired by an idea of refined, serene beauty, which exploits the harmonious disposition of the veining in a simple, regular texture.

The decorative proposals are characterised by a light mood which overwrites the wood surface, available in the 60x60 and 30x60 mm sizes. The square effect decorative piece, on the other hand, returns to the theme of balance, thanks to the geometry of the form which creates an elegant optical evocation, also available in 120x120 mm.

The collection offers an ample range of solutions for unique, personalised floors, with six colours, four types of size, all ground with natural surfaces, and two mosaics.

Technology: porcelain stoneware

Colours: Tortora | Grigio | Beige | Wenge | Crema | Bianco
